### 🌟 PROFESSIONAL SUMMARY

I am Md Sahin Alom — an Electrical Engineer based in Savar, Dhaka, Bangladesh, with practical experience in industrial electrical maintenance, power distribution networks, and standby generation systems. My work includes hands-on maintenance of LV/MV distribution, transformer and switchgear operations, Automatic Transfer Switch (ATS) wiring, and single-line diagram (SLD) preparation using AutoCAD Electrical. I combine thorough technical analysis with practical site execution, ensuring that industrial power systems are safe, compliant, and built for uninterrupted production.

### 🛡️ LICENSING & CERTIFICATIONS

#### ABC LICENSE

PRIMARY

##### Electrical Licensing Board

Electricity Licensing Board (ELB), Bangladesh • Category A, B & C

#### PROMPT ENGINEERING

##### Generative AI & Prompting

LinkedIn Learning • Issued Jan 2025

#### DESIGN THINKING

##### Design Thinking in AI Age

LinkedIn Learning • Issued Jan 2025

JIRA & PM

Managing Jira Projects

Atlassian · Issued Jan 2024 · ID: 70e90c15ad04

UX DESIGN

Foundations of UX Design

Coursera / Google · Issued May 2023 · ID: NWGWMNS22HRY

EDUCATIONAL BACKGROUND

2024

EEE Department

BSc in Electrical & Electronic Engineering

Green University of Bangladesh

2018

ET Discipline

Diploma in Engineering (Electronics & Telecommunication)

BCMC College of Engineering & Technology

2014

Science Group

Secondary School Certificate (SSC)

Panikauria Secondary School

TOOLS & INSTRUMENTATION

AutoCAD Electrical

Single-Line Diagrams (SLD)

Load Schedule Analysis

Generator / ATS Wiring

Transformer & Switchgear

Power Factor Improvement (PFI)

Fluke Earth Tester

Megger Insulation Tester

MS Office / Excel

ETAP

PVSyst

PROFESSIONAL EXPERIENCE

Junior Electrical Engineer

PRESENT

2024 – Present

STYLLENT KNIT LIMITED

Dhaka, Bangladesh

Responsible for electrical system maintenance, power distribution, and infrastructure projects at a large garment manufacturing facility.

- Engineered and commissioned a 1250 KVA standby diesel generator installation, eliminating production downtime during grid outages
- Oversee daily operations of the facility's LV/MV power distribution network
- Coordinate preventive maintenance schedules for transformers, switchgear, and motor control centres

- ◆ Prepare electrical drawings, single-line diagrams, and load schedules using AutoCAD Electrical

**UX Engineer**  
**BLUSYENERGY LTD**

Remote

2022 – 2024

Worked at the intersection of electrical engineering and digital product design, building user-facing tools and dashboards for energy monitoring and management platforms.

- ◆ Designed and developed interactive energy dashboards for real-time power monitoring
- ◆ Collaborated with electrical engineers to translate technical data into accessible UI/UX
- ◆ Built data visualisation components for grid performance and consumption analytics
- ◆ Bridged engineering and product teams to improve technical product usability

**⚡ CORE TECHNICAL COMPETENCIES**

**Power Systems Analysis**

Load Flow   Short-Circuit   Stability Studies   Harmonic Analysis   PSCAD   PSS/E

**HV Substation Design**

69kV-500kV   Single-Line Diagrams   Protection Schemes   Grounding   AutoCAD   ETAP

**Renewable Energy Integration**

Solar PV   Wind   BESS   Interconnection   Grid Code   Power Quality

**Protection & Control**

Relay Coordination   IEC 61850   SCADA   PLC   Arc Flash   NFPA 70E

**Transmission Planning**

N-1 Contingency   Capacity Studies   Voltage Regulation   Loss Analysis   GIS

**Power Quality & EMC**

THD   Flicker   Capacitor Banks   Filters   IEEE 519   EN 50160

**🛡️ OFFICIAL DECLARATION**

Certified electrical engineer credentialed by the Electricity Licensing Board (ELB), Bangladesh. All details and educational qualifications are accurate and verifiable.
